

The ERA-AGE Conference: findings from Europe's first joint programmes in ageing research

**10 November 2015
London, UK**

This European conference profiles the research which has been produced by projects funded through two ERA-AGE initiatives:

- Six research projects on Active and Healthy Ageing from the Joint Call for Research in Ageing programme (JCRA AHA).
- Two cohorts of post-doctoral FLARE Fellowships for early-career researchers.

These two initiatives represent Europe's first joint research programmes in the ageing field and funded exclusively multi-national and multi-disciplinary research.

During the morning session the conference will present findings from all the JCRA AHA projects and a number of the FLARE projects.

During the afternoon two parallel sessions are on offer – including one for early-career researchers - to present lessons learned on key issues in multidisciplinary, multinational research.

The event is fully funded and places are open to researchers and stakeholders in ageing research from across Europe.
